

A Few Words From Our Executive Director About An Important Issue

California Air Resources Board Draft Scoping Plan

June 27, 2022

Dear Members,

The ECA has recently signed onto a business coalition letter to the **California Air Resources Board (CARB)** regarding serious concerns over CARB's **Draft 2022 Scoping Plan Update** in attempting to achieve the goals set forth in AB32/SB375 —addressing and mitigating greenhouse gas emissions arising from activities in California.

The coalition submits that new and ongoing CARB regulations must be soundly justified and obtainable both technologically and financially; they must be as commanding or as tempered as the proof and data indicate is best; and that the evolution and ongoing evaluation of CARB's policies and regulations should reflect input from all affected stakeholders, including the most affected industries. For more information, and the complete letter, please follow the link, below.
